Powerful software for your success

abas Business Software supports midsize production, distribution and service companies in all processes along the value added chain. Transparent and consistent processing of all business-relevant information puts you in a position to act on the basis of facts at any time.

ABAS places great value on making the solutions' operation and design as easy as possible for users. Focus is placed on the role-based visualization of data and processes relevant for the respective user.

You can efficiently manage your processes by using abas Business Software. The system provides maximum flexibility when it comes to changing the organization or reacting to new strategic requirements.

Whether complex automated processes in the supply industry, eBusiness or mobile applications - ABAS creates space for developing the essentials! You will thus gain more time to press ahead with your own innovations, or to establish and extend your customer and vendor relations.

The evolutionary method for the permanent and long-term modernization of abas Business Software is unique in the ERP market. abas Business Software proves the standard product life cycle ad absurdum. This is extremely valuable to the abas user because through the upgrade the user always remains on an up-to-date status while individual modifications and settings are maintained!

Our mission: using our experience and innovative strength we want to provide you with simple but, at the same time, modern technological solutions, which will help you to be successful in a constantly changing business community. Today and in the future!

Software from a midsize business for midsize businesses

The core competence of ABAS is the development of flexible ERP and eBusiness software for midsize companies. ABAS was founded in 1980 and has now become an international group of companies with 50 abas partners in 30 countries. ABAS covers the entire range of small and midsize businesses from 4 to 400 ERP users.

Business philosophy: „The Spirit of ABAS“

Satisfaction, quality, and service go together – ABAS is guided by this principle in its daily work. The main idea is that abas customers can concentrate on what is of most importance to them: their core business. ABAS is user-focused and looks for the constructive dialog with their customers, their suggestions give important input for further development of abas Business Software. Honesty and trust contribute to a continually profitable cooperation. ABAS has proven this for over 30 years.

Solid economic basis

ABAS has always relied on a stable economic basis. It is the requirement to invest in innovations and for long-term planning. ABAS has been making profit for the past 15 years. The strategy of the sustainable development in connection with independence of banks and investors will also be important for ABAS in the future.

Global partner network through common dedication

ABAS has assembled a global network of qualified implementation partners: about 50 abas software partners in 30 countries worldwide know the requirements of their local markets. They guarantee short reaction times and high service quality. With the international abas implementation methodology, which has been proven in numerous projects, ABAS ensures implementation success even across borders.
